ACOPTIC - CCC1582

Dielectric cables for direct-buried

BENEFITS

- The ACOPTIC® range includes ACOME's optical cable solutions for telecommunication networks.
- CCC1582 cables are dielectric cables suitable for burial and long-distance applications in optical collection networks and in metropolitan area networks (MANs), i.e. ODF and centre interconnections, as well as in transport networks.
- Their mechanical characteristics and design make the CC1582 compatible with installation by pulling through ducts.

APPLICATIONS

- Dielectric (earthing not required)
- Especially resistant to crushing: it can be installed in the ground over very long lengths
- Compact-Tube® technology allows fast, simple and safe use for fibre access without special tools

RECOMMENDATIONS

Storage and installation

- The cables are supplied with protective wrapping that must be maintained until the product has been fully used.
- The rules for storage, transport, and cable laying are described in our ACOPTIC Guide.
